

Region of Queens *Transportation Needs and Feasibility Study - Public Consultation Sessions*

The Queens Care Society, in partnership with the Region of Queens Municipality, has initiated a study to examine the potential for an accessible and affordable transportation solution within the Region of Queens.

WSP Canada Inc. has been contracted to prepare the study and will conduct public consultation sessions to gather information from residents to assess the needs and feasibility of a community transit service program within the Region.

Public input is vital to understanding the transportation needs of residents and this input will help determine the type of service that would best meet the community needs. Residents of Queens are invited and encouraged to attend one of the session to ask questions and to express their thoughts on this important issue. Your insight is essential in shaping future plans for public transportation.

WHEN: January 9th, 2017

**WHERE: Queens Place Emera Centre (Community Room)
at 10:30 a.m.**

or

**Masonic Hall in Caledonia (9859 Highway #8)
